

So, this is manual about LewdDew Valley mod on StarDew Valley, I have no idea how I should write it, so I'll just put here everything I have, and then with your feedback we'll redact it to readable one, lol.

I also put right here on the front page a Patreon link, where you can support me. With your help, updates will released much faster and better. Therefore, if you can, and ONLY if you can, support me [here](#), please, because I have so many good ideas (some of them you can see in this manual) and I really want to release it.

Well here, you can see some kind of table of contents I guess (click on it):

# Main terms

So, you've start this mod, visited lewdness plane, met all lewd characters and returned to your house. What's next?

The main idea of this mod, to bring some progression with help of new "lewdness" parameter, than higher this parameter then more interesting scenes you can see. Sounds great, but I am dumb as fuck (I hope children don't read it, it's adult only mod c'mon delete all this stuff, if you are under 18), so I've made entire new characters to implement this parameter. That's it new lewd characters are nothing more than integer parameter which shows lewdness level. So if you want to find them for some reason, you won't be able, because there are no any ways to go to lewdness planes right now, any other situations when something asked you to meet them, like festival, of quests, it's just a bug, I'm sorry.

Therefore, the only way to increase the "friendship" with lewd character (and friendship represents lewdness level) you need to communicate with original character, watching lewd scenes, or choose lewd answers in dialogues, and in future gifting special stuffs to original character will also increase friendship with lewd character(this mechanic actually already exists, I just can't come up with items).

By the way, despite the fact that they are just integer number, I've decorated them as succubus because in future I'm planning to add a whole story line about lewdness planes.

And, here are main terms:

- Original character(OC) or just name - the vanilla character
- Lewd character (for example lewd Leah) – the lewd character(Leah)
- Lewdness level or LewdHeart – the friendship with Lewd character

***WARNING. All changes applies at next morning, so, if you get enough hearts and LewdHearts with character, the lewd event will appear only at next day***

If you by some reason can't watch event try to use SMAPI console with line like "debug ebi event id", e.g. "debug ebi 3" will show you Abigail's 8 heart event corresponding to the Abigail's LewdHeart level.

# Dating Update

**New phone functionality** – as you know Robin sells phone, which allow you to call other shop owners and check their assortment etc. Now there is new response:

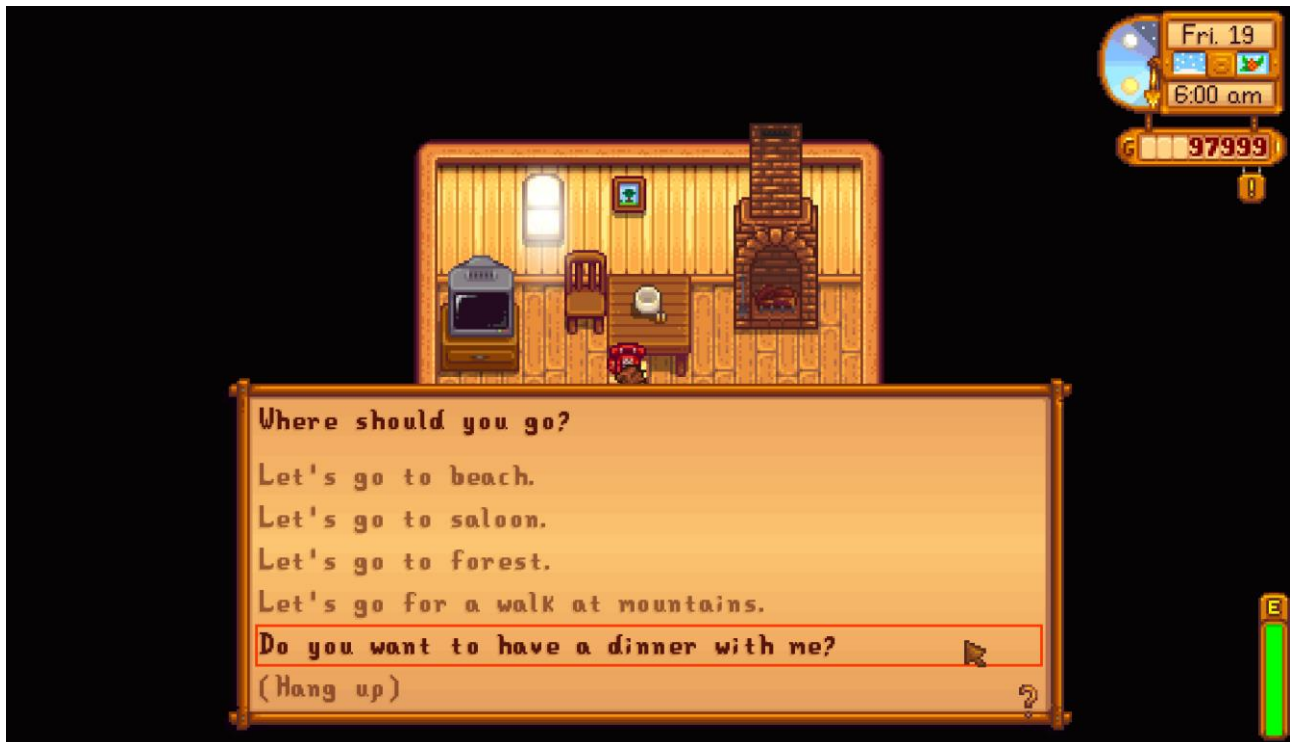

This option allows you to call girls with at least 2 friendship hearts:

(As you can see I have only 5 options to call, because only with these girls I have more than 2 friendship hearts )

When you chose girl you should chose place to go. There are 6 options 4 common: Beach, Forest, Saloon, Mountain; and 2 special: Secret forest and Dinner at your place.

To get access to secret forest you need to visit it (or revisit if you have already opened it before this update). And to ask girl for a dinner you need at least 6 friendship hearts with her.

(As you can see I have Dinner option with Jodi because I have 6 friendship hearts with her, but I haven't Secret forest option because I haven't got proper axe and can't to visit it)

When you make all your choses, you need to visit proper location in proper time **AT THE DAY YOU MAKE THE CALL** (e.g., I chose Jodi for a Dinner, so event will start at 17:00 at **THIS** day at farmer house).

All your calls cost you 1 gift slot, so if you've already presented 2 gifts for Leah at this week you can't call her, and if you've already calls Leah twice at these week you can't call her for a third one. In addition, you can't call several girl at one day, **one girl per day**, that's the rule (for now).

So, we have 6 options for a date, but 4 of them is outside and the season will affect the result of a date. Actually there are 5 different endings of the dates: awful (-100 HP,-100 LHP), negative (-100 HP,0 LHP), neutral (0 HP,0 LHP), positive(100 HP,0 LHP), awesome(100 HP, 100 LHP), where HP is heart points and LHP is Lewd heart points. The result depends of the girls preferences (which you can find by experiments,

because I won't tell you about it) e.g. Haley don't like beach at winter, but Abigail actually like to explore snowy shore, or Penny don't like Saloon etc.

Here you can find events IDs and time when you should to go for a date:

**BEACH 1400-1800:**

# TECH UPDATE

This update provide compatibility with Stardew Valley Extended, xTardew valley and multiple spouses. Note, now LewdDew\_Valley and LewdDew\_Valley\_helper folders are in zLewdDewValley folder, so you must just put zLewdDewValley in Mod folder and, if you have had this mod before remove previous version folders LewdDew\_Valley and LewdDew\_Valley\_helper only zLewdDewValley must be in folder Mods. Jeez, I hope you get it.

## **Stardew Valley Extended:**

Now you can comfortably play SVE with this mod. You don't need to download any other additions, just install this mod in Mod folder and play your SVE save or start new game, all changes will apply automatically.

## **Xtardew Valley:**

If you have this mod installed and LewdDew Valley events conflict with Xtardew, you'll see xtardew valley event's first and then you'll get offer to watch LewdDew version, yeah that's not storytelling friendly, but I think it's only workaround right now.

## **Multiple spouses:**

When you enter in your house after 17:00 you'll see list of all vanilla girls, so chose one of your wives, and if you chose not your wife it inform you and let you chose again. I'll rework it in future, because I think this system not very comfortable.

## **New content:**

Now in farm cave, where you can collect fruits or mushrooms, you can find a crack on the wall and in Extended version through this crack you can get in Lewd realm.

## ***Extended version***

From now and until the release there will be two versions of this mod Usual and Extended. Extended version is for 5\$+ patrons and provide additional content such as events or shortcuts and cheats. Extended version will be releasing along with the usual. Usual versions will frequently releasing on Patreon, and several updates will thematically form big update, which will release on Nexus for everyone, but without content from Extended version. Note that all content from Extended will be released for everyone on Nexus with final update of LewdDew Valley.

In Extended version right now you can find:

HOT COFFE events, and path to Lewd realm in your farm cave. In Lewd realm there are not any events right now, but you can gift presents to lewd essences of girls, and progress in lewd relationships faster.

## Plans on future

“Dating update” is available for 5\$+ patrons only, and it allows you to call girls out for a date and progress with LewdHearts through the dialogues and search new collectables.

This update will be released for 1\$+ patrons in November with other mod’s compatibility (such as xtardew, SVE, and others that you’ll vote) as a “Technical update”

Finally, with all bugs fixes and localizations, it will be released on Nexus at December as a “community update” (and yes, I’ll fix grammar).

After this I hope to return to the girls and make some stories expansion, like group and NPC’s with NPC’s events, I will consult with my patrons about these updates. That will be “StarDew Valley Lewd Stories” update. Moreover, after that I want to introduce “lewdness planes” update, which will finish Meta plot with succubus and lewdness in StarDew valley.

This is visualization of roadmap for this year:

In addition, I think I found out how to make this mod playable for female character, but this workaround seems very difficult so it will take a lot of time I guess, but of course, if we reach corresponding goal at Patreon it will become main priority.
